

A platform designed to deliver more complete care

Last year, Rupa joined forces with Fullscript to develop a unified platform to fuel whole person care. Soon, your provider will begin recommending lab testing through Fullscript. The platform may be different, but you'll have the same great experience and help staying on track with your testing.

Here's what you need to know about the move to Fullscript.

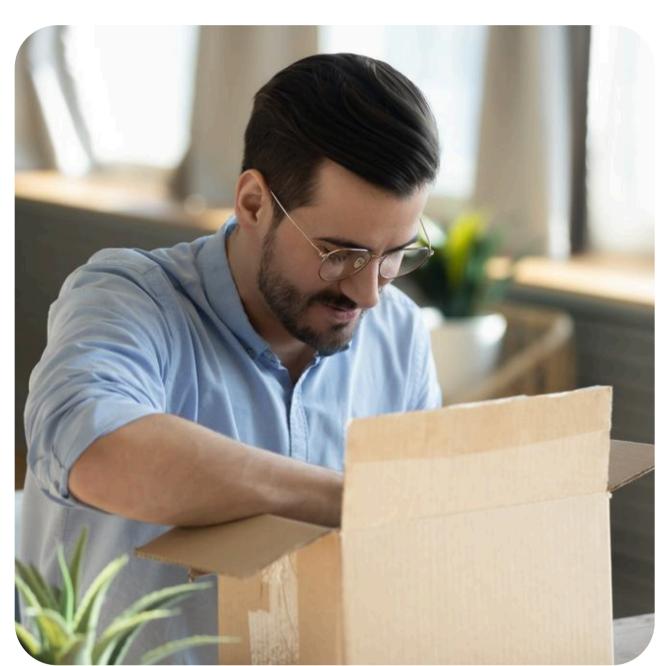

Continue your care journey without missing a beat

- Once your provider has moved to Fullscript, the next time you log in to Rupa, you'll be prompted to connect to your existing Fullscript account or create a new one it only takes a minute.
- Any existing lab orders you received through Rupa should still be paid for using the Rupa payment link or patient portal. So you can proceed with any testing as planned without disrupting your health journey.
- Moving forward, you'll be notified of new lab orders via email and purchase them through your Fullscript account. You'll find all your historical results and vital Rupa patient data available within the Fullscript platform.

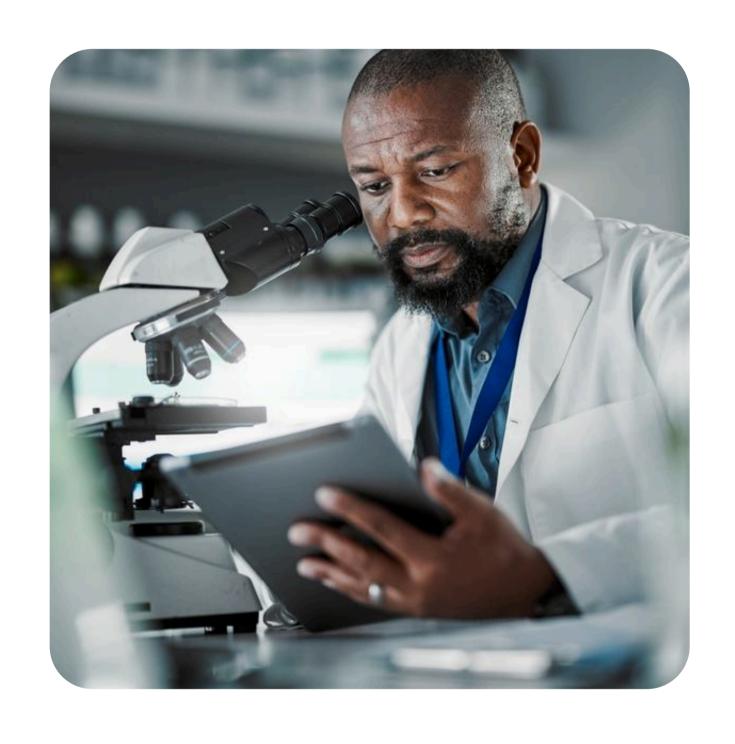

Here's what you can look forward to with labs on Fullscript

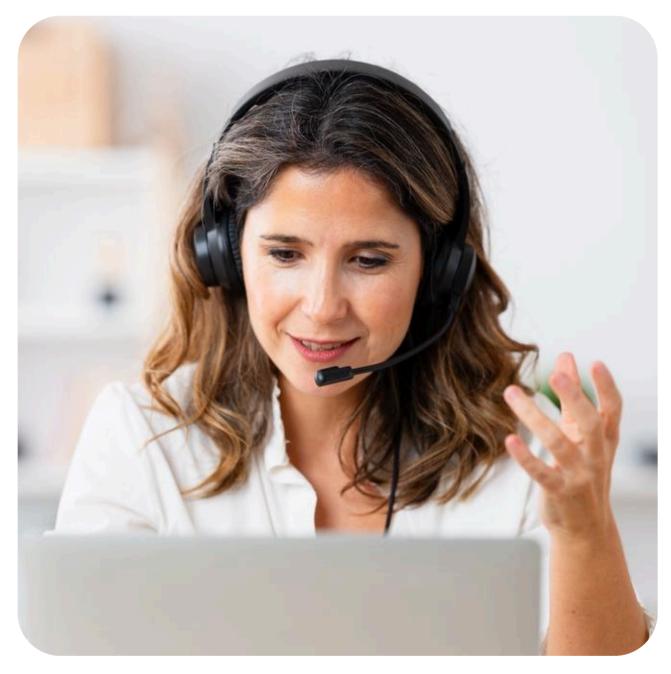

Continuity in care. You'll have uninterrupted access to the same biomarkers and tools that make testing easier you adhere to – including a range of phlebotomy options to make getting blood drawn less of a pain.

Competitive prices, zero surprises. We work directly with all our diagnostic partners to get you great prices on labs – with transparency so you always know what you'll need to pay. And you'll enjoy fast, free delivery on every shipment over \$50.

Quality you can count on. We take your health and trust seriously. That's why lab products offered by Fullscript are reviewed and validated by our team of healthcare experts for clinical relevance, reporting clarity, and operational excellence.

World-class customer support. We're fully-committed to providing a great experience every time. Explore these <u>FAQs</u> or contact our support team for via <u>phone</u>, <u>email</u>, or <u>chat</u>.
